

JuiceBox[®]

SMART [GRID] EV CHARGING

PRO
40

THE WORLD'S SMARTEST ELECTRIC VEHICLE
CHARGING STATION (EVSE)

All JuiceNet devices
can minimize CO2 by syncing
their charging to grid conditions

JuiceBox SmartGrid EVSE

Extending our state-of-the-art line of residential smart-grid EVSEs, JuiceBox Pro 40 is a fully compliant J1772 Level 2 charging station with all required safety and charging system features.

JuiceBox not only brings extremely fast charging with anywhere, anytime status and control, but our green feature also minimizes greenhouse gas emissions by

synchronizing the timing of EV charging to periods when your electric grid offers the cleanest power and highest share of renewable energy.

Now you can reduce your greenhouse gas footprint — all the way from the power source. Enjoy average CO2 reductions of up to 60% relative to a typical charging station.

INTERACTIVITY

With all connected JuiceBox products, you get 24x7 status and control via our mobile app.

CONTROL

JuiceBox is the only EVSE that affords both direct user control and smart-grid optimization — our JuiceNet platform allows you to reduce energy costs, select a cleaner electricity mix, and participate in grid services rebates that reduce total cost of ownership (in applicable geographies).

PORTABILITY

Our products use standard power outlets (NEMA 14-50). If you move, JuiceBox goes with you.
